

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

On April 20, while on a ramble, I discovered a Migrant Shrike's nest. The nest consisted of coarse grass lined with feathers, and was placed in a tall hedge about seven feet from the ground. When approached she would fly from the nest or perch on the nearby hedge or light on the ground in the distance, never ceasing to watch my every move. When I left the nest she would return immediately. Their favorite food (mice) was impaled all along the fence on the thorns. Though I visited the place frequently I saw only the female bird.

KATIE M. ROADS.

Election of Members

The following names are proposed for membership in the Wilson Ornithological Club:

FOR ACTIVE MEMBERSHIP.

Edward J. Brown, Division of Birds, U. S. Nat. Mus., Washington, D. C.

George Seth Guion, Napoleonville, Louisiana.

Alexander Walker, Box 436, Armour, South Dakota.

O. E. Baynard, Clearwater, Fla.

FOR ASSOCIATE MEMBERSHIP.

Frances Stillman Davidson, 1392 W. S. Grand Ave., Springfield, Ill.

Publications Reviewed

Observations on the Yellow-billed Tripic-Bird (*Phæthon americanus* Grant) at the Bermuda Islands. By Alfred O. Gross.

Contributions from the Bermuda Biological Station for Research No. 23. With nine plates. From the Auk, Vol. XXIX, No. 1, pp. 49-71.

This paper represents intensive studies of this species during two summers. It is as complete a life history as could be expected, with some interesting additions from the observations of those who live on these isolated islands. The accompanying pictures give a graphic account of the growth of the young and their development of feathers. We welcome it as another addition to the literature on life histories.

L. J.

Our Mid-Pacific Bird Reservation. By Henry W. Henshaw,
